

We help Pharma and CRO-companies to get clinical data earlier and safer

Berzelius Clinical Research Center 

Berzelius Clinical Research Center AB

Focus on clinical conduct of early phase clinical trials in a hospital based dedicated clinical research unit

Berzelius Clinical Research Center 

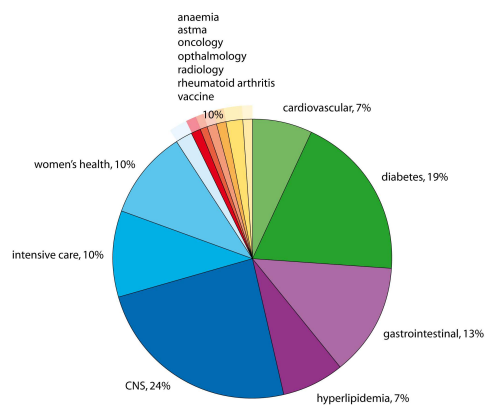

Clinical Research Unit

- Dedicated hospital based 18-bed clinic
- Folke Sjöberg, Medical Director,
 - Anesthesiologist, professor in Intensive Care / Burns
- Fredrik Huss, MD, PhD, Intensive Care / Burns
- Lena Sundin, Operational Manager,
 - Senior Research Nurse Anesthesiology/Intensive Care
- 6 Research Nurses (4 with background in Intensive care)
- 2 Nurses Assistants (1 with background in Intensive Care)
- 5 part time Physicians and 12 Research Nurses

Berzelius Clinical Research Center

Study Experience

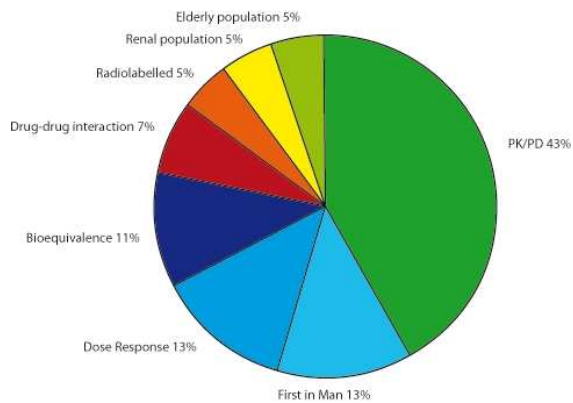

Since 2002 Berzelius CRC has conducted more than 90 clinical trials within a broad range of indications.

Berzelius Clinical Research Center

Type of Early Phase Studies

Experience in early phase studies over the last 3 years (61 studies).

Berzelius Clinical Research Center

Access to Investigators, healthy volunteers and patients

- Excellent collaboration with hospital- and primary care based physicians
- Student population of 25 000
- In-house database of 3 000 subjects (patients and volunteers)
- Special populations
- Proactive recruitment

Berzelius Clinical Research Center

New tools for efficient drug development

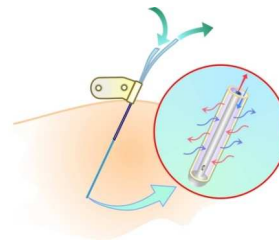

- Microdosing / Microdialysis
 - CMA Microdialysis AB
- Medical Imaging and Visualization
 - Center for Medical Imaging and Visualization

Berzelius Clinical Research Center

Microdose / Microdialysis

- Probe or tube in tissue of interest
- Local pharmacodynamic study
- Effect of compounds on
 - Fat tissue
 - Muscle
 - Bone
 - Wound tissue
 - Local metabolism of compound
 - Others

Berzelius Clinical Research Center

Medical Imaging

- CMIV - Center of Excellence in Medical Imaging and Visualization
- Front-line research in e.g. Synthetic MRI
- Dedicated research resources for CT, MRI and PET
- Close integration with the clinical settings at the university hospital in Linköping
- and with BCRC for efficient conduct of clinical trials with imaging technologies
